

A tech-savvy accountant takes client support to the cloud.

Andrew McPhun
Accountant at Susan Carter CPA
Jacksonville, FL

“QuickBooks Online Accountant gives us the ability to connect with clients in a much quicker, more streamlined way, and QuickBooks Online saves our clients money.”

Andrew works smarter by working online

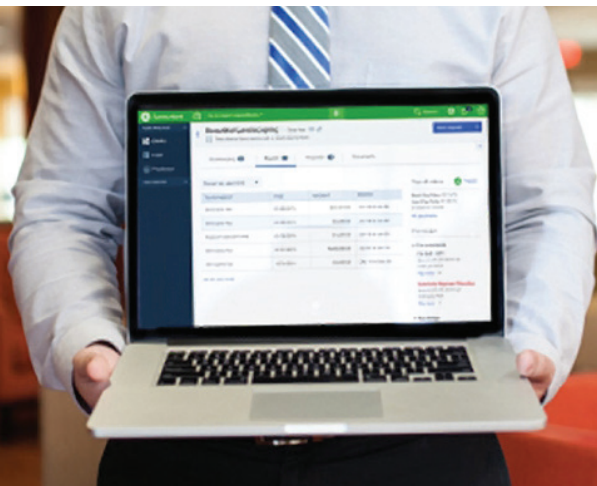

When Andrew sees a chance to improve the status quo, he can't resist. It's just the sort of accountant he is.

So while his colleagues were using desktop accounting software, he decided to experiment with working online. He was curious to know if it would be an improvement—and he soon got his answer.

Why Andrew loves the Document Center

Andrew's online initiative soon caught on, and now his workplace is developing a paperless infrastructure designed to boost both efficiency and cost savings.

He says that their greatest asset is QuickBooks® Online Accountant—in particular, the built-in Document Center.

“It's one of the features that I'm excited to show everyone. Clients can just log in to their QuickBooks and attach a document I've requested. It saves time for both of us.”
