

*“Being advanced certified makes me and my clients confident in my knowledge.”*

**Stacy Kildal**  
Kildal Services, LLC  
Advanced Certified QuickBooks ProAdvisor®  
White Lake, MI

**Building a practice through certification**

When Stacy started her practice, she had years of experience in bookkeeping and accounting. But setting up on her own made her want to prove that she had what it takes. That’s why she joined the ProAdvisor Program and got certified right away.

*“It’s pretty simple. Without the ProAdvisor Program, I wouldn’t have the successful practice that I have now.”*

Today, Stacy is a Diamond-level ProAdvisor who coaches and trains other ProAdvisors as well as running her practice. Her advice? Get certified.

“The training is written by ProAdvisors who use QuickBooks Online every day in their own work. You’ll learn best practices that will save you an enormous amount of time.”

Advanced Certified ProAdvisors not only develop expertise to help support their clients, they also enjoy a priority listing on the Find-a-ProAdvisor directory, so they can grow their practice too. *“It’s the icing on the cake. I still get a lot of referrals from my listing.”*

**Why Stacy loves the Diamond level**

As Stacy will tell you, the Advanced Certification exam is challenging. But she says that’s part of the reward. By passing

the exam and reaching Diamond level, she has proven that she has an outstanding level of QuickBooks® expertise—plus, she has gained access to top-tier support, anytime she needs it.

*“You get straight through to the most knowledgeable people at Intuit. They bend over backwards to make sure you get answers when you need them.”*

“I love to say ‘here’s what we put into place to solve your problem,’ and then hearing the sigh of relief on the other end of the phone. Being certified gives me the expertise I need when my clients need it most.”
