

Items to Note

Items to Note

The main purpose of this conversion is to get your data ready for the following tax year. Therefore, viewing a Form 1040 or business equivalent form will not display the same results that had been filed. Some of the data is also placed in input fields that appear to be incorrect but are used as place holders. When the return has been transferred to the following year, these amounts will go to the correct input fields.

Items to Note:

- **Number of Assets** - The conversion program converts a maximum of 2500 assets.
- **Date of Birth** - Verify date of birth in Client Information and Dependents, and adjust if necessary.
- **Depreciation** - In the 2014 program, AMT prior depreciation should be reduced by Section 179 and any special depreciation taken in 2013. State depreciation entries should be reviewed and adjusted as necessary.
- **Vehicles** - ProSeries converts only the first two vehicles entered per entity to ProSeries Screen 30 from the ATX Vehicle Expense worksheets which are part of Schedule C, Schedule C-EZ, Schedule E, Schedule F, and Form 2106, Form 2106-EZ. Therefore, Additional vehicles in the third and fourth columns will need to be reentered.
- **General Business and Passive Activity Credits** - The Form and Prefix Number cannot be converted. You must adjust detail in "Form" and "Number of Form" (ProSeries Screen 34, codes 1 and 2).
- **State Information** – State information does not transfer.

Note: We also recommend that you review and update the following items after your conversion:

- Carryovers, such as credit carryovers and NOLs
- Prior year summary (review in 2014 program only)
- Any hurricane-related issues that overlap years, such as pension withdrawals
- Foreign tax credit carryovers
