

Intuit GoPayment

Intuit GoPayment (gopayment.com) enables small businesses and their employees to get paid fast by easily processing credit cards via their mobile phones. The mobile payment solution enables a variety of small businesses, from those just starting, to those more established, to process mobile payments with support for more than 40 mobile phones, including iPhone, Blackberry and Android devices, and a range of optional credit card reader hardware.

GoPayment gives business owners the features they need to get paid fast. After swiping or manually entering a credit card number, funds are deposited into their bank account within 2 to 3 business days without any arbitrary transaction caps that delay them from getting their money. To save even more time, GoPayment offers the ability to create and sell from a list of frequently sold items, apply sales tax and send customized receipts via text and e-mail with a map of where the transaction took place. To reduce manual data entry, transactions can be easily downloaded into QuickBooks Pro or Premier 2009 or later and QuickBooks 2010 for Mac and later versions.

GoPayment is affordable with no contract, set-up or cancellation fees. Business owners can allow up to 50 employees to use a single GoPayment account. Live customer support is always available in case help is needed.

Get Paid Fast

- **Get Paid Fast:** Credit cards are authorized in seconds and funds are deposited directly into a user's bank account within 2 to 3 business days. There is no need to write down payment information, call into the office, process checks or chase payments later. There are no arbitrary transaction caps that delay a small business from getting paid.
- **Simple to Use:** Log into GoPayment and enter basic card information directly into a phone or swipe cards with a variety of card readers. Authorization takes place in seconds and users can email or text message a customized receipt to customers directly from their phones.
- **Monitor GoPayment Transactions with Ease:** Access Intuit's free online Merchant Service Center 24/7/365 from any PC with internet access. Search by different criteria to view transactions processed via GoPayment and manage GoPayment users in the Merchant Service Center. Users can even use the Merchant Service Center to process the occasional back office transaction.
- **Around the Clock Customer Support:** Intuit provides 24/7/365 live customer support for GoPayment users.

Offers More Options for Different Needs

- **Compatible with More Than 40 Mobile Phones:** GoPayment is compatible with more than 40 mobile handsets and continues to add support for the newest, most popular mobile devices.
- **Supports Range of Card Reader Hardware:** GoPayment supports a range of credit card reader hardware. This includes a free or low-cost card reader that supports a variety of mobile devices for the cost-conscious new business owner. It also includes more robust, professional card readers for established small businesses with higher processing volume, including the mophie card reader for the iPhone.
- **Works with QuickBooks:** To save time and increase bookkeeping accuracy, the more than 4 million QuickBooks users can download GoPayment transactions into QuickBooks Pro or Premier 2009 and QuickBooks 2010 for Mac and later versions.
- **Scalable Solution:** Add up to 50 employees to a single GoPayment account by simply providing them with a user ID and password. Users are easily managed from the online Merchant Service Center.

Keeps Data Protected

- **Protects Credit Card Data:** Customer credit card information is never stored in a GoPayment user's phone and a unique user ID and password is required to access GoPayment, so sensitive customer information is always kept safe.
- **Gives Customers Peace of Mind:** Customers feel more confident in transactions with small businesses because their cards never leave their sight.
- **Instant Verification:** Customers are provided an instant receipt via e-mail or text message for payment confirmation.
- **Data Is Encrypted:** GoPayment encrypts credit card data both via the app and supported credit card readers.

Intuit GoPayment

Pricing

See <http://gopayment.com/pricing.html> for the latest pricing plans.

Availability

GoPayment is available at www.gopayment.com.

Phone Requirements

There are two ways to process credit cards with GoPayment:

- **Mobile application version:** Download the GoPayment mobile application onto more than 40 supported phones. GoPayment supports a wide range of popular mobile phones, including the iPhone and many Blackberry and Android devices with more being added all the time. Check <http://gopayment.com/supported-phones/> for the latest supported phone list.
- **Mobile Web browser version:** Access GoPayment on any mobile phone with a mobile Internet browser. GoPayment works with any carrier, but requires a minimum data plan.

Card Reader Hardware

GoPayment supports a range of credit card reader hardware, including a low-cost option for small businesses just getting started to a more robust, professional option for more established businesses. These card readers support a variety of mobile devices. To see current hardware options and pricing, please visit: <http://gopayment.com/supported-phones/>
