Key New Features and Enhancements

Save Time

- **Express Install.** QuickBooks has a new installation option to let QuickBooks users save time getting started. The new "Express" install skips unnecessary questions to streamline processes and reduce the number of set-up screens from 15 to 6.

- **Add/Edit Multiple List Entries.** QuickBooks users can now edit multiple lists of items, customers, or vendors, using the new rapid data entry feature. Users wanting to enter data from outside of QuickBooks can simply copy their data from Excel and paste it directly into QuickBooks.

- **Forms Customization and Intuit Creative Solutions.** QuickBooks users can ensure that their invoices and other forms get the attention they deserve. They can select from free professional designs to customize forms for their businesses. Users who want help designing a unique look can set their own price[1] and Intuit Creative Solutions connects users to a community of professional designers who submit a variety of options based on user specifications and budget.

- **Add Check Signatures.** QuickBooks users no longer need to print and scan checks to add their signature. Users can now add their personalized check signatures directly onto checks in QuickBooks.

- **Custom Fields.** QuickBooks Enterprise Solutions users gain more fields, more flexibility, and more control with custom fields for customers, vendors, employees and items. Users save time labeling data more accurately and have the option of advanced filtering and sorting functionality to run reports with the custom fields.

- **Intuit Statement Writer.** QuickBooks Enterprise Solutions users can create financial statements quickly and accurately with the improved Intuit Statement Writer. Users can link QuickBooks files directly with Microsoft Excel® to build and update professional statements with more ease.

- **Inventory Assemblies.** New enhancements to Inventory Assemblies allow QuickBooks Enterprise Solutions users to save more time. Features include a new quick editing capacity and the ability to create custom fields in assemblies to track builds more closely.

Make Money

- **Company Snapshot.** This popular feature has been taken to the next level by allowing QuickBooks users the ability to customize which reports display on their screen and print them on one page, providing an immediate view into their bottom line. Users can choose from several reports including new reports for yearly expenses and income comparisons, detailed expense and income breakdown, and a top customer list.

- **Report Center.** QuickBooks users gain insights to make better business decisions in the re-designed Report Center. With more than 100 available reports, users can now navigate between common reports in three different views and find them quickly by tabbing between memorized reports, favorite reports, and recently viewed reports. Additionally, each report is tagged with common keywords so users can search for the report they need.
