

## What's New

### See Where Your Money is Going, Not Where it Went

Quicken Online is the first free, Web-based personal finance service to give consumers a forward-looking view of their money over the next couple of paychecks. The paycheck spending forecaster automatically detects bills and paychecks over 30 days. Consumers can get ahead of their finances and find ways to save easier than ever.

### Fresh New Look, Improved Budgeting Tools

With a streamlined new look, Quicken Online provides users with critical financial updates upon log-in. Bill reminders, transactions not yet cleared, and account balances are all displayed simply in the clean interface. Consumers receive alerts to mobile phones or PDAs, when they're getting close to going over their customized budgets or balances, saving money by avoiding overdraft fees.

## Key Features

**All accounts in one place via superior connectivity** – Immediate access to information from more than 5,000 financial institutions including banks, credit cards and more – all in one place with just one password.

**Mobile phone access** – Manage money with Quicken Online from Web-enabled phones. Full optimization with the iPhone™ makes it even easier to view and use.

**Security you know and trust** – Protecting critical data is Quicken's greatest priority – and has been for over 20 years. Intuit adheres to the highest industry standards and uses the same technologies used by the world's major financial institutions, including banks, stock exchanges and brokerage houses.

**Dynamic categorization** – Quicken Online automatically categorizes your expenses, so you can start seeing where your money is going in each individual account or across all of your accounts. It's easy to create your own custom categories.

**Know your RealBalance™** – Plan for expenses and splurges with a *real* view of what's coming in and going out of your accounts in the near future. RealBalance™ shows balances and transactions from your banks, credit cards and other accounts, plus any upcoming deposits or expenses you've entered manually. The result: A true view of what you have to spend, not just the amount of money you have in your account.

**Reminders to help avoid late fees** – Quicken Online bill reminders via text message or e-mail will help you say goodbye to penalty charges or higher interest rates from credit card companies due to late payment.

**Quicken support is a click away** – Customers can easily access Quicken Online support via an easy-to-find permanent link on the homepage and e-mail. Additionally, Quicken Online offers product and financial tips from other users, blogs, and podcasts, and provides information about upcoming Quicken events and more.
