

Welcome to Quicken Home Inventory Manager 2007.

This new software is designed for everyone who wants to protect their valuables against loss in the event of disaster. Quicken Home Inventory Manager 2007 offers you an easy way to fully document everything you own, helping you achieve a quick, equitable settlement with your insurance company in a time of crisis.

Keep an organized record of your personal possessions: Get rid of folders stuffed with receipts and photos sitting in your digital camera. Put everything together in an easily accessible place, so you'll always have a complete and accurate record of your home valuables in case of a theft or catastrophic event.

"...I am so excited to finally have a way to do all the things I want to with my home inventory. With the bad weather we have in Florida and theft, fire ...I want to get pictures taken and added quickly - this will be great."

— Philip King, Merritt Island, Florida

Getting Started is a Breeze

Easily add items to your home inventory list without the hassle of required fields

Create hundreds of records by simply typing in the name of the item or by adding an image with a photo you've take with your digital camera. Users can add up to a maximum of five images per item, including photos and electronic images such as receipts. There are no required fields other than an item name or an attached image.

Just "drag and drop" images from your hard drive to the Home Inventory Bin..

Create Detailed Records and Attach Proof of Purchase

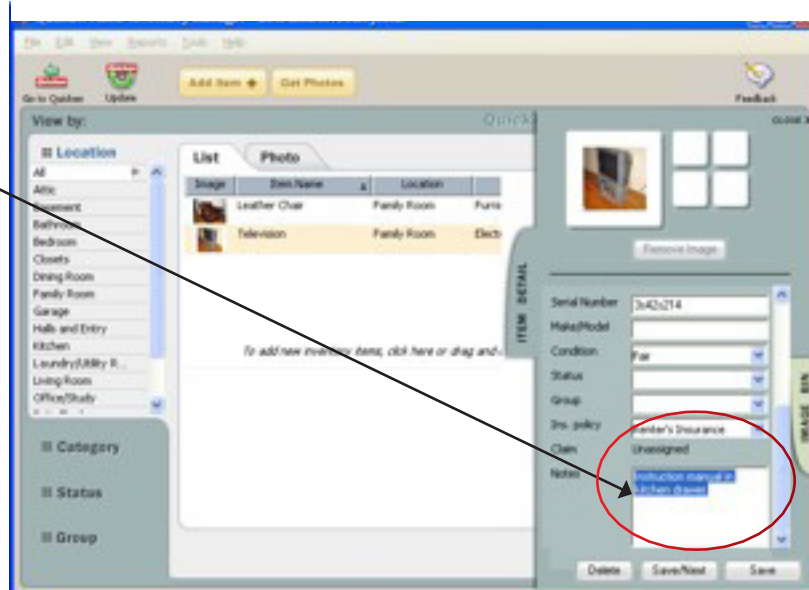

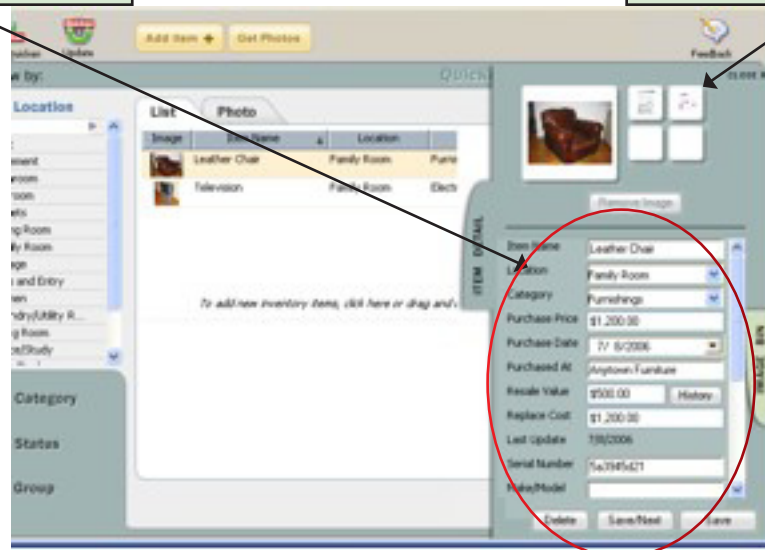

Add details and key documents to home inventory items to file a more complete insurance claim. Providing the purchase price can expedite the claims process and helps ensure fair reimbursement.

Add as much - or as little - detail as you choose. Include a picture of a room and a listing of all items. Or photograph each item separately and include a complete description of its features and value. In addition to scanning price tags, warranties and receipts, it's easy to attach electronic receipts from items that you have purchased online.

The details section allows you to record where you bought the item and any serial, make or model numbers.

You can view receipts, along with images and other important details.

There's plenty of room in the "notes" section to add information such as provenance for antiques, names of artists who produced artwork, and more.

Organizing the Data is Easy with Pre-set Categories

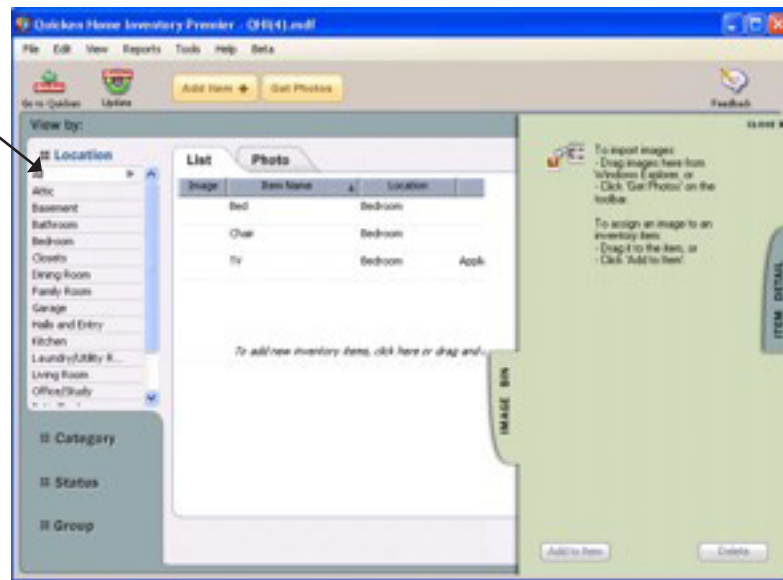

Quicken Home Inventory Manager offers several ways to organize the data. You can use the pre-defined categories or create your own

Categorize by:

Location – a place or room in home, such as garage or den

Category – the type of item such as furniture or appliance

Status – describes any changes to the item, such as sold or donated

Location Name	Total Items
Attic	0
Basement	0
Bathroom	0
Bedroom	3
Closets	0
Dining Room	0
Family Room	0
Garage	0

Group Name	Total Items
------------	-------------

Customize categories in this section based on your specific needs. Create groups such as "My favorite things" or "My husband's tools."

Integration with Quicken Personal Finance Software

Quicken Premier, Home & Business, and Deluxe customers have been taking advantage of the text-only, home inventory feature in the software. All that stored data can now easily be imported into Quicken Home Inventory Manager where you can create and manage complete records. Additionally, you can import the value of all your belongings into Quicken Personal Finance Software to get a more accurate picture of your total net worth.

After launching the application for the first time, just select to import data from the home inventory function in Quicken Personal Finance Software.

Shown to the right is data from a Quicken Personal Finance Software home inventory file imported into Quicken Home Inventory Manager.

"...all my data downloaded into the software without any problem at all. What it showed me was that I neglected to put in a LOT of information which would really be helpful. It is easy to understand and easy to use and I think it's important for people to have this type of program"
