

To Whom It May Concern:

This letter is being sent as a result of your recent inquiry on Intuit's current efforts with respect to audit controls for Intuit Payroll Services' payroll processing and tax reporting services.

Intuit is required to file an annual certification of our control environment, as required by the Sarbanes-Oxley Act of 2002. The certification was required for the fiscal year ending July 31, 2008. Intuit has filed the certification and complied with all requirements related to the Sarbanes-Oxley Act. At this time, Intuit does not intend to pursue a SAS 70 certification for the payroll and tax processing operations within our Fiscal Year ending July 31, 2009.

Very truly yours,

Lloyd Brenner Director of Accounting and Controls
Intuit Small Business Division Payroll
