

QuickBooks Enterprise Keeps a Nonprofit's Accounts Auditable and Accessible

Natural foods grocery store relies on QuickBooks Enterprise for to manage its finances and handle payroll with ease.

Always audit-ready. The only nonprofit grocery store in Ashville, North Carolina, French Broad Food Co-op, employs 35 people and must ensure that its finances are auditable.

“Our status as a nonprofit makes accounting a bit different,” says Finance and Project Manager Sage Turner. “The way QuickBooks seamlessly integrates balance sheets, cash listings, and P&L statements, while making it so easy to drill down into different categories, makes reporting much easier.”

“On the rare occasion that I’ve had an issue, being able to call Intuit is very helpful.”

— Sage Turner, Finance & Project Manager

“On the rare occasion that I’ve had an in-depth payroll or W-2 issue, having the Intuit Full Service Plan and being able to call in for unlimited support is very helpful,” Turner says.

Payroll automation. Turner joined the company five years ago and QuickBooks Enterprise was already in place. She added the Advance Payroll module and also subscribes to the Full Service Plan.

Turner lauds QuickBooks Enterprise for providing substantial time savings. “Using Advanced Payroll has saved me hours upon hours,” Turner says. “There’s a lot of automation in the federal and state reports that are very handy. We also use the Live Paycheck feature, which is really helpful for staff.”

For quarterly tax reports, the system fills out the federal and state forms automatically. “I used to go through and fill them out myself,” Turner says. “Now all I need to do is run an error check.”

A long-term love affair. She can’t imagine using any other accounting system. “I’ve been using QuickBooks for about 15 years, and I love it. I’m a QuickBooks expert in my area. I’ve used it in so many different types of businesses. It’s adaptable no matter what size or type of business you have—as large as ours or a small mom and pop.”
