

Just One Person Keeps This Office Running, Thanks to QuickBooks Enterprise

Office Manager schedules jobs, manages subcontractors, and keeps everything humming at a Georgia drywall company.

Change for the better. As the office manager of Residential Drywall in Hiram, Georgia, Suzanne Woolum has too much on her plate to waste time with an accounting system that is difficult to use. In addition to answering the company's main phone line, tracking multiple drywall job schedules, managing subcontractor relations and payments, and running the office, Woolum takes care of the company's accounting needs with QuickBooks Enterprise Contractor's Edition.

Residential Drywall

Industry: Construction

Business Challenge:
Ability for one person to manage the office and accounting

Prior Software:
Peachtree

Our custom P&L in QuickBooks is a great feature that has saved us money on payroll with the subcontractors."

—Suzanne Woolum,
Office Manager

When she started with Residential Drywall 15 years ago, the company used Peachtree, but Woolum initiated the move to QuickBooks Enterprise. "I didn't like Peachtree at all. It was very hard to figure out," she says.

Accounting hub. Ease of use is important because Woolum has the accounting software open all the time. "Anything that goes through the business goes into QuickBooks."

She emails all of the company's invoices now, which saves considerable time on each invoice along with the cost of paper and postage.

Woolum can't live without the profit and loss data that sits at her fingertips in QuickBooks Enterprise. "We customized our P&L so it's set up for each house we do. It includes the name, lot, subdivision, sales price, job material, and labor. I can condense it or show everything."
