

Enterprise Solutions hosting heats up business, even out of the office

Getting work done remotely used to be inefficient and time-consuming for Joseph Hansen, president and owner of Boiler Pros of Chicago — until he stepped up to QuickBooks Enterprise Solutions Hosting Service.

Loyal to QuickBooks. Boiler Pros of Chicago President Joseph Hansen has relied on QuickBooks in its various iterations since 1999. When he consolidated his business to focus solely on servicing and installing residential and commercial boiler systems in 2010, staying on the platform was a no-brainer.

He's always been pleased with how easy the software is to use. And now it's his go-to business tool. "We do payroll, we do job costing, we do our accounts payable, our accounts receivable — we do everything with it," he says.

"We do payroll, we do job costing, we do our accounts payable, our accounts receivable — we do everything with it."

— Joseph Hansen, President, Boiler Pros of Chicago

Remote access gives time back. "It's phenomenal," Hansen says of QBES Hosting Service, which he began using recently. "It lets me do a lot more than I used to. When I'd work from my home office, I had to take home a disk, download it, and sit through a half-hour of unproductive time. This has been a godsend because now I go home, I log in, and I don't even have to come into the office. It's really nice."

Moreover, the hosting service keeps Hansen's external accountant fully up-to-date on the business because he can access the company's data through the cloud. "He can just log in from his office once a month," Hansen says. Fewer in-person trips by Hansen's accountant reinforces the main benefit QBES Hosting Service has provided the overall business of Boiler Pros — an ability to operate more efficiently.
