Financial Statements

Financial Statements

Chart of Accounts

The Chart of Accounts represents the "hub" of your accounting system. Every transaction you enter flows through to the Chart of Accounts. The end result of the accounting process is the financial statements. In QuickBooks, your Chart of Accounts is your financial statements. Each account in the Chart of Accounts becomes a line on either the Balance Sheet or the Profit & Loss Statement.

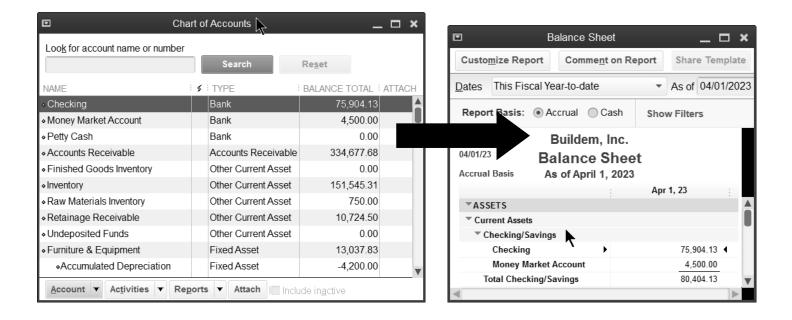

You use the Chart of Accounts to track the financial transactions of your company. For instance, a check for office supplies would not be categorized as Advertising Expense or Cleaning Expense. Instead, the check would be categorized as Office Supplies.

Balance Sheet

The Balance Sheet is the financial *snapshot* of your business. If someone took a photograph of your business right now, what would the financial picture look like? The Balance Sheet is comprised of **assets**, **liabilities**, and **equity**.

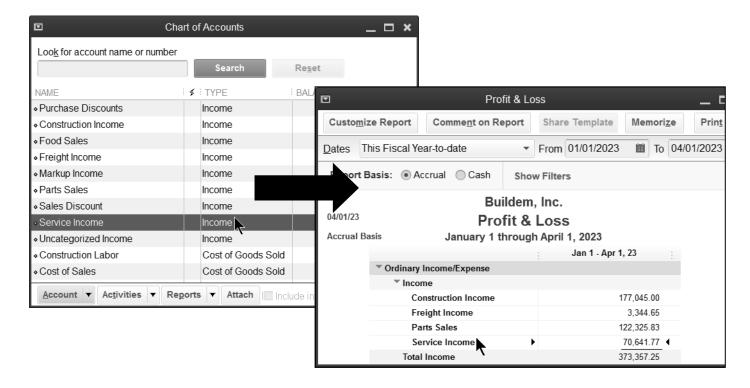

- **Assets**: Those items owned by your business including amounts owed to you by others. Assets include all your company owns such as cash, receivables, and inventory.
- **Liabilities**: What your business owes other people and companies. Liabilities include accounts payable, payroll taxes due, and loans.
- **Equity**: What the owners really own in the business. Equity accounts include common stock and retained earnings.

Profit & Loss Statement

This statement is the *movie* of your business. It measures activity over a specified time period. This financial statement includes **income** and **expenses**.

- **Income**: Income accounts track money that comes into your company for goods and services you produce for others. Examples include sales and service income.
- Expenses: Expense accounts track what your business spends for goods and services. Expense accounts include utilities and office supplies.

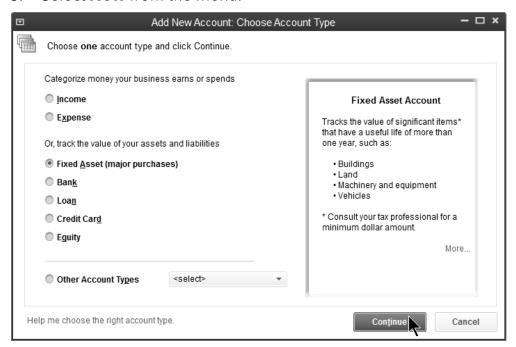

Account Types
The most important element when working with the Chart of Accounts is the Account Type. This must be correct or your financial statements will be wrong!

Statement	Туре	Description	Example
	Bank	Your bank accounts	Checking and Savings
	Accounts Receivable	Transactions with your customers	Accounts Receivable
	Other Current Asset	Assets likely to be converted into cash within year	Inventory and Short-term Investments
	Fixed Asset	Assets depreciated over a time period of greater than a year	Furniture & Fixtures and Computer Equipment
Balance Sheet	Other Asset	Assets that do not belong in the other asset types	Long-term Investments
	Accounts Payable	Transactions with your vendors	Accounts Payable
	Credit Card	Company credit cards	American Express and VISA
	Other Current Liability	Liabilities to be paid within year	Sales Taxes Payable and Payroll Taxes
	Long Term Liability	Liabilities not to be paid within 1 year	Mortgage Payable and Long-term Bank Notes
	Equity	Owners' share of assets after liabilities paid	Retained Earnings and Common Stock
Profit & Loss	Income	Various sources of your company's revenue	Service Income and Sales
	Cost of Goods Sold	Tracks the cost of product sold	Materials and Cost of Sales
	Expense	Operating expenses other than Cost of Goods Sold	Office Supplies and Rent
	Other Income	Non-operating income	Interest Income
	Other Expense	Non-operating expense	Interest Expense

Items

Understanding Items

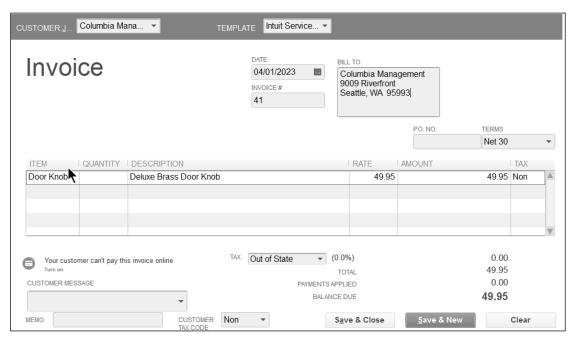

Items are critical to maximizing the use of QuickBooks. Items perform these functions in QuickBooks.

- 1. Any line item on a purchase order, invoice, or estimate must be set up as an Item.
- 2. Items make it easier to fill out sales forms.
- 3. Items act as *pointers* for the financial statements. In other words, items handle the behind the scenes accounting for sales and purchases.
- 4. Items allow you to track quantities purchased and sold in addition to dollars purchased and sold.

Item List

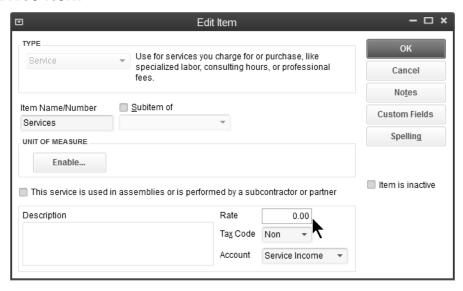

Item on Invoice

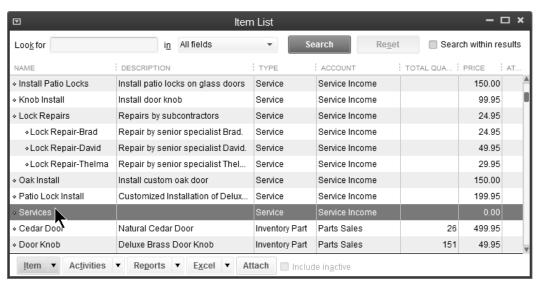

How Much Detail

How much detail is necessary when setting up items? The rule of thumb is to set up as much detail as possible to get the full benefit of items. However, the limit is 14,500 items in a QuickBooks company file (unlimited in QuickBooks Enterprise Solutions). A good method is to set up individual items only if it will be used more than once. If an item will only be used once, a *generic* item might be more appropriate.

Setting Up Payroll

Payroll Setup

Perform these three steps to set up payroll from scratch:

- 1. Select Payroll Service
- 2. Payroll Setup Interview
- 3. Create Payroll Schedules (optional)

1-Select Payroll Service

Basic Payroll

A *Basic Payroll* subscription is for companies who pay their employees directly, but have an accountant file tax forms. With this service you set up payroll, enter employee time, process paychecks, and make tax deposits. The service gives you up to date federal and state tax tables. This allows QuickBooks to calculate taxes automatically. Basic Payroll requires a subscription, a unique EIN, Internet access to download tax table updates, and a current version of QuickBooks*. Checks are sold separately. Terms, conditions, features, pricing and service options are subject to change.

Enhanced Payroll

Enhanced Payroll offers all the features of Basic Payroll, plus additional features that make running payroll faster and easier. You can print federal and state tax forms directly from QuickBooks. There is also a built-in method for tracking, reporting, and calculating workers compensation. A service called E-pay lets you electronically pay federal and selected state taxes. And, you can do net-to-gross calculations easily when preparing paychecks. Enhanced Payroll requires a subscription, a unique EIN, Internet access to download tax table updates, and a current version of QuickBooks*.

Assisted Payroll

With a Assisted Payroll subscription, all you need to do is enter hours for your employees and Intuit does the rest of the work for you.

After you enter employee hours into QuickBooks, the data is sent to Intuit via the Internet. Intuit creates paychecks and calculates and files payroll taxes for you. You can either print the paychecks or use the direct deposit service. Each quarter, Intuit sends you a copy of the filed federal and state payroll tax forms. At the end of the year, Intuit prints and mails you the W-2's. To use Assisted Payroll, you must have an internet connection, a unique employer id number, state withholding and unemployment tax id numbers, and a current version of QuickBooks*.

Direct Deposit

With the *Direct Deposit* option, you enter bank account information for each employee. Then, you enter paychecks in the normal fashion. Finally, you send the paycheck information to Intuit. The funds are directly deposited in each employee's bank account.

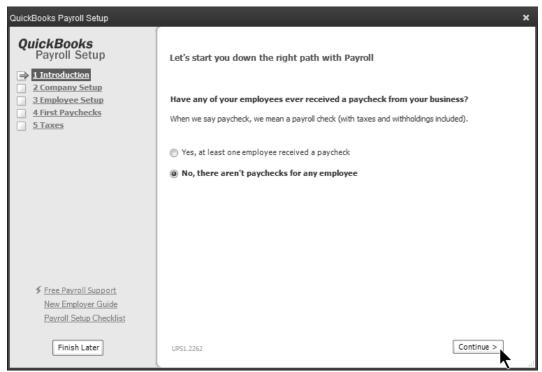

* Intuit's payroll services are compatible with the latest version(s) of QuickBooks. However, supported versions are subject to change.

Updating QuickBooks

Versions

A new version of QuickBooks is released approximately every year. A new version adds new features and improvements. Intuit charges a fee for the purchase of a new version. Contact Intuit for current prices.

After the new version is installed, QuickBooks asks you whether your data file should be updated to the new version. By typing "YES", QuickBooks automatically updates your file to the new version. Once the file is updated, you can no longer open the data file in the previous version.

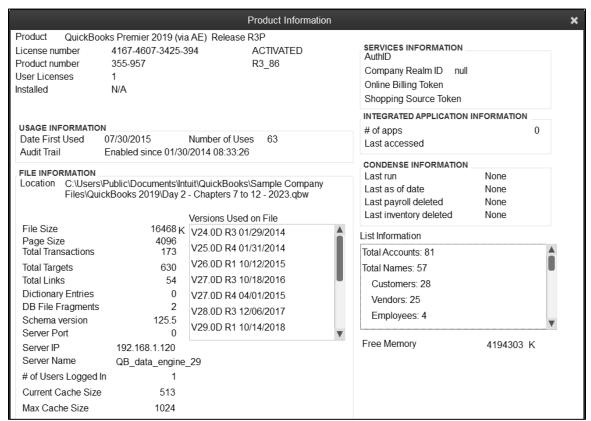

Maintenance Releases

Intuit occasionally creates maintenance releases for an existing version of QuickBooks. A maintenance release usually corrects problems in QuickBooks not discovered until after distribution of a new version. Also, Intuit might add features that were not available at the time the version was distributed. Intuit does not charge a fee for maintenance releases.

To determine the current version and release of QuickBooks, display the *Product Information* window.

Year-End Procedures

Year-End Steps

You can keep as many years of data in QuickBooks as you wish. However, there are certain procedures you should follow at year-end. In this chapter, you learn 3 steps to complete in QuickBooks at year-end. Consult your accounting professional regarding all year-end procedures your company must complete.

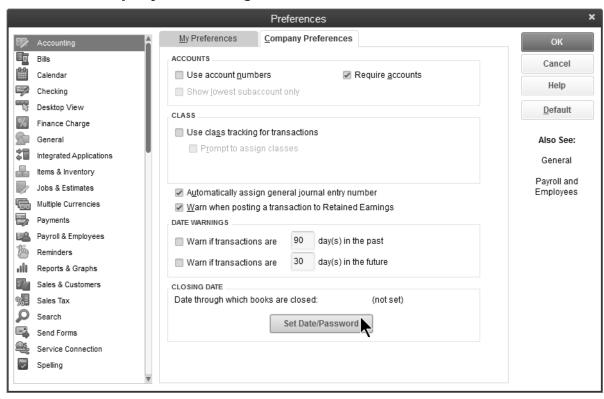

- Set a closing date and password to restrict users from a prior period.
- 2. Provide your accountant with your QuickBooks financial information using a method such as the *Accountant's Copy*.
- Incorporate changes from accountant.

Set a Closing Date

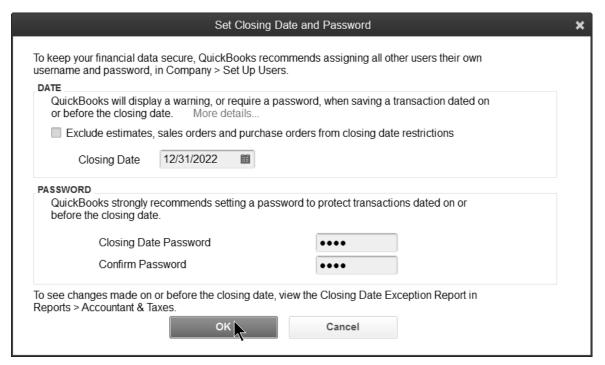

This year-end procedure involves restricting user access to prior accounting periods and setting a closing date and password. To make a change to a prior period, a user must have access and must know the closing date password.

Set a Closing Date & Password

1. Select Company:Set Closing Date from the menu.

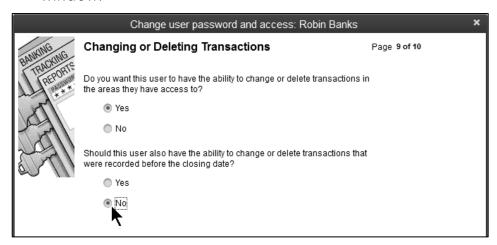

2. Click Set Date/Password.

- 3. Enter a Closing Date.
- 4. Enter the password as the **Closing Date Password**.
- 5. Enter the password as the **Confirm Password**.
- 6. Click OK.
- 7. Click **OK**.

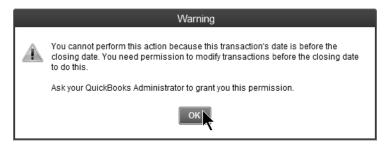

Restrict User Access to Prior Period

- 1. Select Company:Set Up Users and Passwords:Set Up Users from the menu.
- 2. Enter the **Password** in the **QuickBooks Login** window.
- 3. Click OK.
- 4. Select the appropriate user.
- 5. Click the **Edit User** button.
- 6. Click the **Next** button until you see the **Changing or Deleting Transactions** window.

- 7. Select if the user can change or delete transactions prior to the closing date.
- 8. Click Finish.
- 9. Click Close.

No Access to Prior Transactions

Financial Info to Accountant

The Accountant's Copy is an efficient way to work with accountants that use QuickBooks. With this process, a special copy of your data file can be given to your accountant to enter adjustments. Meanwhile, you can continue to work on your original data file. When the adjustments are complete, the changes are imported into your original data file.

There are restrictions on you and your accountant while an Accountant's Copy exists. For a list of restrictions, search for "Accountant's Copy" in the QuickBooks Help system.

A *Dividing Date* is used to ensure changes you make in the current period don't conflict with changes your accountant is making in a prior period.

Create Accountant's Copy

- 1. Select File:Send Company File:Accountant's Copy:Save File.
- 2. Click Next.

- 3. Select a **Dividing Date** for the **Accountant's Copy**.
- 4. Click Next.
- Click **OK**.

Incorporate Accountant's Changes

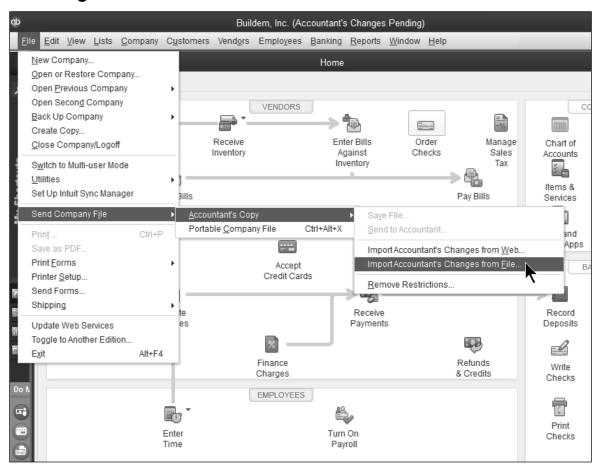

If you use the Accountant's Copy, you can import your accountant's changes into your QuickBooks data file.

If you are not using the Accountant's Copy, there are several ways your accountant's changes can be incorporated into QuickBooks. For example, your accountant might send you a list of year-end journal entries and ask you to enter them into QuickBooks. Or, your accountant might travel to your office to enter year-end journal entries.

Consult with your accountant to determine the most efficient way of entering their changes in QuickBooks.

Import Accountant's Changes

 Select File:Send Company File:Accountant's Copy:Import Accountant's Changes from File.
