QuickBooks
Quick Start Guide

What to know before you start

First time installing QuickBooks?
- Relax—it’s easy!
- We’ll help you each step of the way.

Upgrading from a previous version of QuickBooks?
- Don’t worry—installing WON’T affect your company file.
- You will be prompted to update your company file after installation.

Have questions about setting up or upgrading QuickBooks for multiple users?
- Check out the included multi-user checklist.

1  Start installation

Put the QuickBooks CD in your CD drive

- If the installer doesn’t start automatically:
  - Click Start from your Windows menu (bottom left of your screen)
  - Choose Run
  - Type D:\setup.exe (where D is your CD drive)
  - Click OK

We’ll ask you some questions to help you install QuickBooks. The next steps highlight some of your key choices.

2  Choose installation type

Express: Let install make all the right choices for you!
We recommend most users choose this option.
If you chose this option, click Next to proceed with the installation.

Custom and Network Options:
Customize the installation options and location.
If you choose this option, go to Step 3.

3  Make multi-user choices

Custom and Network Options

Which option should I select?

If you use QuickBooks on this computer and this computer DOES share company files with other computers (This can be changed later)

Choose: I’ll be using QuickBooks on this computer.

If no one uses QuickBooks on this computer and it only stores company files that other users open across the network, this will install the QuickBooks Database Manager only and does not require a license.

Choose: I will NOT be using QuickBooks on this computer. I’ll be storing our company file here so it can be shared over our network.

4  Choose where to install

Choose installation folder

We recommend that

New users
Accept the suggested folder to install QuickBooks

Note: The installer will select one of the options, based on existing versions of QuickBooks found on the computer.

Upgraders
Replace your previous version of QuickBooks unless you need to have more than one version installed. This will NOT overwrite your company file.

Accountants
Choose the first option, accept the default folder and DO NOT overwrite your previous version if you need to use multiple versions.

- Get help with Intuit products
- Start and grow your business
- Get help for Accountants
Accountants visit [www.accountant.intuit.com/helpme](http://www.accountant.intuit.com/helpme) to connect with other accounting professionals about accounting, tax issues, and product questions.

How do I add additional users to QuickBooks?
You can buy additional QuickBooks licenses in two ways:
- In QuickBooks, go to the Help menu, click Manage My License and click Buy Additional User License
- Call Intuit Sales at 1-800-316-1370
- Accountants call Intuit Sales at 1-800-267-6379

Next steps for upgraders

**Start QuickBooks**
Double-click the QuickBooks icon on your desktop.

**Open your current company file**
QuickBooks automatically opens your existing company file and prompts you to back up. Then, your company file is updated to the latest version of QuickBooks.

If it doesn’t open, click Open an existing company file

![Open an existing company file](Image)
Open an existing company file. Already have a QuickBooks company file? Open the company file or retrieve from a QuickBooks backup.

Updating your company file takes about 15 minutes.

Learn about new QuickBooks features

**Go to the Learning Center to learn about new features in QuickBooks 2010**
